

Graphics Designer

VIRTUAL STUDENT FEDERAL SERVICE

Project Title	Graphics Designer
Project Summary	We are looking for a creative and innovative individual to help develop various images and infographics for a range of materials.
Country	United States

Project Description

The National Nanotechnology Coordination Office (NNCO) is the coordination office for a White House-led initiative that involves 20 Federal agencies working in the emerging field of nanotechnology with cumulative investment of over \$31 billion. The NNCO acts as the primary point of contact for information on the National Nanotechnology Initiative (NNI); provides technical and administrative support to the The Nanoscale Science, Engineering, and Technology (NSET) Subcommittee, including the preparation of multiagency planning, budget, and assessment documents; develops, updates, and maintains the NNI website nano.gov; provides public outreach on behalf of the NNI; and promotes access to and early application of the technologies, innovations, and expertise derived from NNI activities.

We are looking for a graphic designer to help develop various images and infographics for a range of materials such as strategic plan and annual report, brochures, website content, video animations, and more. Familiarity with nanotechnology is a plus, but not necessary. Looking for creative and innovative individual.

Required Skills or Interests

Skill(s)

Data visualization

Editing and proofreading

Graphic design

Infographic design

Research

Writing
